# Did you know?

That "A" was inspired by an Egyptian cow ox head called Aleph? Its ancient Egyptian pronunciation led to the birth of this remarkable letter.

# And what about "B"?

Its roots can be traced back to a reed hut known as Bet in early Semitic cultures. The letter inherited its name from the cozy concept of a home.

# But the story doesn't end there!

The Phoenicians stepped in, modifying these letters and passing them on to the Greeks. Alpha and Beta emerged, aligning with the Greeks' unique way of speaking.
